SOME OF OUR SOLAR POWER PROJECTS

Introducing our latest solar triumph at Oguzulu Beach and Resort! ☀️ Our robust 15kW solar system is a powerhouse in a no grid zone, seamlessly energizing a myriad of appliances. Picture this: 50+ lights, 5 deep freezers, 2 fridges, 2 microwaves, 2 blenders, 1 sandwich maker, CCTV system, music system, 16 TV sets, 1 hot plate, and 1 bread toaster.

But that's not all – we've also implemented a solar water pump with a remarkable 250-meter head, efficiently transporting water across a staggering 1-kilometer distance. It's not just a project; it's a sustainable energy symphony at Oguzulu Beach and Resort!

Sustainable Power and Water at Lakes of Grace Farm Resort

Empowering Lakes of Grace Farm Resort with over 11.1KW of solar brilliance, our project fuels cold storage, culinary, and entertainment systems. This eco-conscious initiative includes a solar water pump with a 250-meter head, ensuring a sustainable water supply across the resort. Notably, Lakes of Grace operates as a no-grid zone, exemplifying a commitment to self-sufficiency and sustainable practices. Experience the synergy of modern amenities and environmental responsibility.

Empowering Cakely Uganda with sustainability, our recent solar system installation delivers over 6KW of clean energy. This dynamic system efficiently powers a diverse range of appliances, including 60 lights, 6 deep freezers, an ice maker, 2 large bread ovens, a comprehensive CCTV system, two 32-inch TV sets, 4 microwaves, POS Machines, and a music system. This initiative not only enhances operational efficiency but also underscores our commitment to green energy solutions.

TESTIMONIALS

It was indeed a no brainer that we chose Easy Power. From the company CEO to the technician, all staff were very knowledgeable about the products, and one could also tell that there was passion in the way tasks were done of which you don't see around so often today.

They handled our CCTV cameras, Gate automation Electric Fence, and Solar Solutions setup and procurement. They kept on doing such a great job that we also kept on purchasing their products and services. We do highly recommend their services and we are looking forward to working more with them in future.

Thank you Mr. Chris Wegoye, also special thanks to Eng. Joseph Asimwe for his great attitude and tireless efforts. You have added value to our company.
